	I			I			I			I			I			I			I											
		D			D			D			D			D			D			D			D			D			D	
																				A	A	A	A	A	A	A	A	A	A	A

B= Biltricide (7 split doses every 5 days); come 600mg and can be broken into 4 x 150; 50mg/kg divided in two doses 4 hours apart

I = Ivermectin (every 3 days x 7); come 3 mg; about .125 per kg

D=Diflucan or fluconazole (200 mg two every 3 days throughout; anti-yeast diet; some may need more)

A=Albenza – not part of his protocol, but people have reported that it helps; so, we use it when the Ivermectin is completed Comes 200mg. Take two twice a day for 28 days, 2 weeks off, then repeat for three cycles total.
